

Induction training Report

Project Updates

- Introduction of admin roles and onboarding for Freshmo platform. Tadiwa and Rennel provided walkthrough to DeeJay on admin responsibilities.
- Primary admin tasks: inputting course data, student support, creating and managing accounts, uploading courses, modules, lessons, resources, quizzes, and assignments.
- Current course inventory: ~23 courses already in the system (some in draft state).
- Platform content status: limited video content; text-based lessons and downloadable resources (PDFs) are available. YouTube integration planned for future video lessons.
- WhatsApp integration/WhatsApp button reported to sometimes send an error; appears to work on host side but needs verification across devices.

Upcoming Events/Deadlines

- Follow-up session proposed: schedule another walkthrough to allow DeeJay to interact directly with the admin panel and confirm functionality (suggested "tomorrow").
- Developer to continue bug fixes and updates; DeeJay to review site and report issues.

Open Discussion

- WhatsApp button intermittently returned an error for DeeJay; Rennel asked for screenshots to diagnose differences between environments.
- Clarified course creation workflow: title, description, category (health, agriculture, life skills), level (beginner), pricing toggle for paid courses, prerequisites and learning outcomes fields.

- Publishing workflow: courses start as drafts; modules/lessons must be added before publishing.
- Lesson types supported: video (YouTube), text, images, articles, quizzes, assignments. Resources can be uploaded as PDFs for download.
- Assignment submission options: direct text entries, Google Forms URLs can be embedded for submissions and quizzes.
- Deejay confirmed having a Google account for using Forms.

Action Items & Next Steps

- Deejay: review the website/admin panel, reproduce the WhatsApp error, capture screenshots, and report back with specifics. (Owner: Deejay)
- Rennel/Development: investigate and resolve WhatsApp button issue; continue applying updates and fixes identified during review. (Owner: Rennel)
- Rennel: schedule the next hands-on admin panel session for Deejay to practice course/module uploads and publishing. (Owner: Rennel)
- Deejay: prepare sample course content (text/manuals, PDFs) to upload during the next session. (Owner: Deejay)

Notes & Key Takeaways

- Admin workflow and course management process demonstrated and understood: create course meta, add modules/lessons, attach resources, set pricing, publish.
- Current limitations: few video lessons available; mostly text-based content for now.

- Communication and troubleshooting: screenshots and device/environment specifics are important for reproducing issues like the WhatsApp error.
- Team availability: Rennel remains available for assistance; DeeJay will follow up with issues and perform testing.

Attendance: DeeJay Whyte Zimbabwe; Rennel Mutinhiri; Tadiwa Tawonameso
